

STONELITE

Stonelite

Where Design Meets Durability

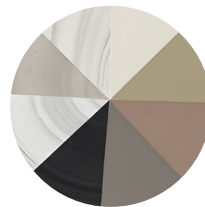

Stonelite redefines what's possible in surface materials, combining the elegance of natural stone with unparalleled strength and versatility. Designed for modern interiors and exteriors alike, Stonelite brings the timeless appeal of stone to any surface — from walls and flooring to bathrooms, swimming pools, furniture and beyond. This unique material offers premium quality, durability, and a refined aesthetic, making it the perfect choice for spaces that demand beauty and resilience.

Whether you're transforming a commercial space or elevating a personal project, Stonelite offers an unmatched blend of aesthetics and functionality. Available in a range of textures and finishes, it allows designers and architects to realize their vision with ease.

Experience Stonelite and transform your surroundings with a material that's as robust as it is beautiful. Tailored to withstand the elements and crafted for creative freedom, Stonelite is more than a surface — it's a statement.

What is Stonelite?

Stonelite is one mm thick stone paste which can be applied on any surface. It can be molded to look like brick, concrete, wood, stone or any other surface, using unique design processes. This surface coating material has been developed from 1000-year-old Middle Eastern technology.

How is Stonelite Applied?

Stonelite is applied using a trowel, brush and other tools.

All Stonelite surfaces are hand made.
